Public Portion:

There were no general public comments offered to the CEQ

Historic Trust Docket:

Director's Report:

Mr. Martin updated the Council on the following:

- **Housing Program:**
Mr. Martin noted that there have been open houses for the two housing vacancies at Coindre Hall and Blydenburgh Park. Mr. Martin reported that as a result of the open houses there are now tenants for these two housing vacancies. Mr. Martin stated that now all available County housing is occupied.
- **Custodial Agreements:**
Mr. Martin noted that there are no updates on the custodial agreements and none of the pending contracts have been completed since the Council's last meeting. Mr. Martin noted that one of the reasons for the very slow progress is due to the reduction in staff and the increased workload at the Suffolk County Parks, Division of Contracts.
- **Current Events:**
Mr. Martin had no current events to report.

Mr. Swanson did, however, ask Mr. Martin to look into a house that was in the John Adams family which is located on Harbor Hill Road in the Village of Head-of-the-Harbor to find out if it has historic significance. Mr. Martin said he would look into the history of the house.

Project Review:

Recommended Unlisted Actions:

A. Proposed Remediation of Stormwater Flooding in the Vicinity of the North Fork Preserve, Town of Riverhead

A presentation regarding the project was given at the meeting by Christopher Poelker, Junior Civil Engineer, Suffolk County Department of Public Works. The project involves the replacement of the failing pipe system that conveys water from the North Fork Preserve to the Long Island Sound and the installation of roadway leaching basins to contain roadway runoff. The new piping system would be sized to handle large storm events and in combination with the leaching basin system is designed to prevent large overland flow that has been eroding the neighboring residents' properties and carrying sediment and undesirable materials to the Long Island Sound shoreline.

Mr. Poelker's presentation included updated information that addressed the questions the CEQ had when the Council tabled the project at its August 21, 2013 meeting. After Mr. Poelker's presentation the CEQ had no additional questions regarding this project.

Mr. Bagg made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. Mr. Swanson seconded the motion. Motion Carried.

B. Proposed Acquisition of Land by Suffolk County for Active Recreation Purposes known as the North Fork Preserve, Inc. IV Property, Town of Riverhead

A presentation regarding the project was given at the meeting by Laretta Fischer, Principal Environmental Analyst, with the Suffolk County Department of Economic Development and Planning. The project involves the acquisition of the underlying fee of 50.58± acres of land by Suffolk County for active recreational-equestrian center purposes. The overall concept of the acquisition is to create an equestrian center known as the North Fork Preserve Equestrian Center with corrals, stables, paddocks, and an indoor arena for all County residents to utilize. Additional project information was also provided by Nick Gibbons, Principal Environmental Analyst, Suffolk County Department of Parks, Recreation & Conservation.

Mr. Bagg made a motion to recommend classification of the proposed project as a Type 1 Action with a Negative Declaration. The motion included that while the CEQ reviewed and approved the Concept Plan to create an equestrian facility that prior to the development Plan being finalized said Plan will be submitted and reviewed by the CEQ. Ms. Hahn seconded the motion. Motion Carried.

Recommended Type 1 Actions:

A. Proposed Acquisition of Land by Suffolk County for Active Recreation Purposes known as the Board of Education Middle Country Central School District #11 Property – Boyle Road, Town of Brookhaven

A presentation regarding the project was given at the meeting by Laretta Fischer, Principal Environmental Analyst with the Suffolk County Department of Economic Development and Planning. Ms. Fischer described that this property is being acquired for active recreation. It was noted that the project includes a multiuse sports field, two baseball fields, two basketball courts, three tennis courts and parking lots. It was also stated that Suffolk County will pay for the acquisition of the property and that the Town of Brookhaven will be responsible for park improvements and maintenance. Additional project information was also provided by Kevin LaValle an Aide to Suffolk County Legislator Muratore and newly elected Brookhaven Town Councilman.

After much discussion regarding the details of the acquisition it was determined that more detailed environmental information was required. Mr. Freleng, Chief Planner with the Suffolk County Department of Economic Development and Planning offered a suggestion to do an expanded Part 3 on the Environmental Assessment Form (EAF) rather than recommending doing a full Environmental Impact Statement. The CEQ agreed with Mr. Freleng and the CEQ decided to table the project so that an expanded EAF Part 3 section could be completed. The CEQ stated that the following additional information should be included in the expanded Part 3 section of the EAF:

- Additional information regarding the existing vegetation on the subject property

- Information regarding the proposed project's impact on traffic in the surrounding area
- Information regarding the proposed lighting for the property and how this lighting will be screened to mitigate impacts on the surrounding neighbors
- Information regarding local community support for the proposed project including copies of the discussed community letters
- Suffolk County Legislative Meeting Minutes relating to the acquisition to provide information relating to the financial implications of the proposed project

Mr. Bagg made a motion to table the proposed project pending the preparation of an expanded EAF Part 3. Mr. Swanson seconded the motion. Motion Carried.

Recommendations for LADS Report:

- A. Recommendations for Legislative Resolutions Laid on the Table November 6, 2013, November 19th, 2013 and December 3rd, 2013

Mr. Corral noted that the staff's SEQRA recommendations are listed on the LADS report but that there was nothing additional to report on these LADS reports.

Mr. Swanson made a motion to accept staff recommendations as presented for the November 6, November 19 and December 3, 2013 Legislative Resolutions. The motion was seconded by Ms. Spencer. Motion carried.

FULL ENVIRONMENTAL ASSESSMENT FORM
6 NYCRR Part 617
State Environmental Quality Review

Part 2 – Identification of Potential Project Impacts

Instructions: Part 2 is to be completed by the lead agency. It is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “YES” to a numbered question, please complete all the questions that follow in that section.
- If you answer “NO” to a numbered question, move on to the next numbered section.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “**Moderate to large impact may occur.**”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action.”
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

6 NYCRR Part 617
State Environmental Quality Review

**Part 3 – Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- * Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- * Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- * The assessment should take into consideration any design element or project changes.
- * Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- * Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- * For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- * Attach additional sheets, as needed.

**RE: Construction of a Recharge Basin for Storm Water Remediation, North Fork Preserve,
Northville, Town of Riverhead.**

Dear Ms. Pierpont:

The Suffolk County Department of Public Works will be presenting a project proposal to the Suffolk County Council on Environmental Quality (CEQ). The CEQ requires the applicant to complete an Environmental Assessment Form (EAF) before they will consider the project. Included in this EAF are questions as to whether or not there are any buildings or sites of historic, pre-historic or paleontological importance located within the project limits.

The above referenced project is situated in Suffolk County in the Town of Riverhead, Hamlet of Northville (See attached map). The project site is located along Sound Shore Road and extends through residential properties down to the shoreline of the Long Island Sound. In the proposal Suffolk County is planning on rehabilitating the drainage system that carries stormwater runoff from the property known as the North Fork Preserve down to the Long Island Sound. The stormwater runoff currently flows through a series of deteriorated pipes and natural swales as it makes its way to the beach. Our intent is to clean the discharge to the beach and prevent damage to neighboring residents due to flooding. The County will do its best to prevent any unnecessary removal of vegetation within the project limits. Enclosed you will find a copy of the Riverhead USGS Quadrangle map showing the location of the proposed recharge basin outlined in blue.

If you have any questions, or need additional information concerning this matter, you can contact either myself or Chris Poelker, Junior Civil Engineer at 631-852-4240.

Very truly yours,

Dear Mr. Colavito:

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to the proposed Construction of a Recharge Basin for Storm Water Remediation, North Fork Preserve, Northville, in the Town of Riverhead, Suffolk County.

We have no recent records of rare or state-listed animals or plants, or of significant natural communities, at this site or in its immediate vicinity.

Our database does have historical records from the late 1800s/early 1900s of three rare plants from Northville:

- **Featherfoil** (*Hottonia inflata*, listed by NYS as Threatened),
- **Live-forever** (*Hylotelephium telephioides*, Endangered), and
- **Slender Crabgrass** (*Digitaria filiformis*, Endangered)

We do not know the precise location of these collections, we have no recent information on these populations, and there is uncertainty regarding their continued presence. We provide this information for your general reference. While their current status is not known, if suitable habitat for any of these plants is present in the vicinity of the project site, it is possible that they may still be found there. We recommend that any field surveys to the site include a search for these species, particularly in areas that are currently undeveloped and may still contain suitable habitat. If any rare plants or animals are documented during site visits, we request that information on the observations be provided to the New York Natural Heritage Program so that we may update our database.

Information about many of the rare animals and plants in New York, including habitat, biology, identification, conservation, and management, are available online in Natural Heritage's Conservation Guides at www.guides.nynhp.org, from NatureServe Explorer at <http://www.natureserve.org/explorer>, and from USDA's Plants Database at <http://plants.usda.gov/index.html> (for plants).

For most sites, comprehensive field surveys have not been conducted; the enclosed report only includes records from our databases. We cannot provide a definitive statement as to the presence or absence of all rare or state-listed species or significant natural communities. This

information should not be substituted for on-site surveys that may be required for environmental impact assessment.

Sincerely,

Dear Mr. Colavito:

In response to your recent request, we have reviewed the New York Natural Heritage Program database, with respect to an Environmental Assessment for the proposed Construction – Recharge Basin – Storm Water Remediation – North Fork Preserve, site as indicated on the map you provided, located in Northville, Town of Riverhead, Suffolk County.

We have no records of rare or state listed animals or plants, significant natural communities or other significant habitats, on or in the immediate vicinity of your site.

The absence of data does not necessarily mean that rare or state-listed species, natural communities or other significant habitats do not exist on or adjacent to the proposed site. Rather, our files currently do not contain information which indicates their presence. For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. This information should not be substituted for on-site surveys that may be required for environmental assessment.

Our databases are continually growing as records are added and updated. If this proposed project is still under development one year from now, we recommend that you contact us again so that we may update this response with the most current information.

This response applies only to known occurrences of rare or state-listed animals and plants, significant natural communities and other significant habitats maintained in the Natural Heritage Data bases. Your project may require additional review or permits; for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the appropriate NYS DEC Regional Office, Division of Environmental Permits, as listed at www.dec.ny.gov/about/39381.html.

Part 2 - RESPONSIBILITY OF LEAD AGENCY

Project Impacts and Their Magnitude

General Information (Read Carefully)

- X In completing the form the reviewer should be guided by the question: Have my decisions and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- X Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. By identifying an impact in column 2 simply asks that it be looked at further.
- X The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact rating.
- X Each project, on each site, in each locality, will vary. Therefore, the examples have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- X The number of examples per question does not indicate the importance of each question.

Instructions (Read carefully)

- Answer each of the 19 questions in PART 2. Answer **Yes** if there will be **any** impact.
- Maybe** answers should be considered as **Yes** answers.
- If answering Yes to a question then check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If threshold impact equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- If a potentially large impact or effect can be mitigated by a change in the project to a less than large magnitude, check the yes box in column 3. A No response indicates that such a reduction is not possible.

Determination of Significance

Portions of EAF completed for this project: x Part 1 x Part 2 Part 3

Upon review of the information recorded on this EAF (Parts 1, 2 and 3) and considering both the magnitude and importance of each impact, it is reasonably determined that:

- A. The project will result in no major impacts and, therefore, is one which may not cause significant damage to the environment. **Prepare a negative declaration:**
- B. **For unlisted actions only.** Although the project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in Part # have been included as part of the proposed project. **Prepare a CONDITIONAL negative declaration:**
- C. The project will result in one or more major adverse impacts that cannot be reduced and may cause significant damage to the environment. **Prepare a positive declaration , proceed with EIS:**

Evaluation of the Importance of Impacts

Information

Part 3 is prepared if one or more impact or effect is considered to be potentially large.

The amount of writing necessary to answer Part 3 may be determined by answering the question: In **briefly** completing the instructions below, have I placed in this record sufficient information to indicate the reasonableness of my decisions?

Instructions

Complete the following for each impact or effect identified in Column 2 of Part 2:

1. Briefly describe the impact.
2. Describe (if applicable) how the impact might be mitigated or reduced to a less than large impact by project change.
3. Based on the information available, decide if it is reasonable to conclude that this impact is **important** to the municipality (city, town or village) in which the project is located.

To answer the question of importance, consider:

- The probability of the impact or effect occurring
- The duration of the impact or effect
- Its irreversibility, including permanently lost resources of value
- Whether the impact or effect can be controlled
- The regional consequence of the impact or effect
- Its potential divergence from local needs and goals
- Whether known objectives to the project apply to this impact or effect

Determination of Significance

An action is considered to be significant if:

One (or more) impact(s) is determined to **be** (both) **large** and its (their) consequence, based on the review above, is **important**.

SUBJECT: Phase I Environmental Site Assessment Review
North Fork Preserve IV
North Fork Preserve Inc.
0600-021.00-01.00-001.004

Please be advised that we have reviewed the Phase I Environmental Site Assessment for the above referenced property transmitted by your office. The assessment prepared by Nelson, Pope & Voorhis, LLC is in compliance with the 11/25/08 Environmental Site Assessment Criteria required by the Suffolk County Department of Economic Development and Planning and Division of Real Estate. Based on the information within the assessment concerning the recent site survey, the review of existing EPA, NYSDEC and Suffolk County Department of Health Services' records in relation to toxic and hazardous waste sites, as well as the historical review of the site and its surrounding areas, it appears that the property in question does not contain recognized environmental conditions.

It is however recommended that the following issues be addressed prior to acquisition.

- 1) The Phase I Environmental Site Assessment noted that the subject property has been farmed in the past. Evidence of accumulated pesticides, herbicides or fertilizers in the soil and/or groundwater related to past farm activities was not mentioned in the submitted Phase I Environmental Site Assessment and therefore should be investigated.
- 2) Please also note that the Phase I Environmental Site Assessment identified two irrigation wells, one in the south central portion of the property and one in the eastern portion of the property. If these wells are no longer proposed to be used they should be properly abandoned in accordance with all applicable regulatory protocols.

If the Planning Division can be of further help in this matter, please let us know.

Part 2 - RESPONSIBILITY OF LEAD AGENCY

Project Impacts and Their Magnitude

General Information (Read Carefully)

- X In completing the form the reviewer should be guided by the question: Have my decisions and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- X Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. By identifying an impact in column 2 simply asks that it be looked at further.
- X The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact rating.
- X Each project, on each site, in each locality, will vary. Therefore, the examples have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- X The number of examples per question does not indicate the importance of each question.

Instructions (Read carefully)

- Answer each of the 19 questions in PART 2. Answer **Yes** if there will be **any** impact.
- Maybe** answers should be considered as **Yes** answers.
- If answering Yes to a question then check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If threshold impact equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- If a potentially large impact or effect can be mitigated by a change in the project to a less than large magnitude, check the yes box in column 3. A No response indicates that such a reduction is not possible.

SUBJECT: Phase I Environmental Site Assessment Review
Boyle Road Property
Board of Education Middle Country Central School District #11
0200-392.00-04.00-016.000 p/o

Please be advised that we have reviewed the Phase I Environmental Site Assessment for the above referenced property transmitted by your office. The assessment prepared by Nelson, Pope & Voorhis, LLC is in compliance with the 11/25/08 Environmental Site Assessment Criteria required by the Suffolk County Department of Economic Development and Planning and Division of Real Estate. Based on the information within the assessment concerning the recent site survey, the review of existing EPA, NYSDEC and Suffolk County Department of Health Services' records in relation to toxic and hazardous waste sites, as well as the historical review of the site and its surrounding areas, it appears that the property in question does not contain recognized environmental conditions.

It is however recommended that the following issue be addressed prior to acquisition:

- 1) The Phase I Environmental Site Assessment noted that the majority of the subject property was littered with assorted residential trash and construction debris. All of this debris should be removed and properly disposed of prior to acquisition.

If the Planning Division can be of further help in this matter, please let us know.

RE: CEQ Review of the Proposed Remediation of Stormwater Flooding in the Vicinity of the North Fork Preserve, Town of Riverhead

At its December 11, 2013 meeting, the CEQ reviewed the above referenced matter. Based on the information received as well as that given in a presentation by Christopher Poelker, Junior Civil Engineer, Suffolk County Department of Public Works, the Council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 53-2013, a copy of which is attached, that the proposed project be considered an Unlisted Action under SEQRA that will not have significant adverse impacts on the environment.

If the Legislature concurs with the Council on Environmental Quality's recommendation that the project will not have a significant adverse impact on the environment, the Presiding Officer should cause to be brought before the Legislature for a vote, a resolution determining that the proposed action is an Unlisted Action pursuant to SEQRA that will not have significant adverse impacts on the environment (negative declaration). However, if the Legislature has further environmental concerns regarding this project and needs additional information, the Presiding Officer should remand the case back to the initiating unit for the necessary changes to the project and EAF or submit a resolution authorizing the initiating unit to prepare a draft environmental impact statement (positive declaration).
