Project Review: (Taken Out of Order)

Recommended Unlisted Actions:

- A. Proposed Installation of Public Safety Radio Communication Equipment at Babylon (1st Precinct Monopole), Port Jefferson (Roof of St. Charles Hospital), and Montauk County Park (GATR Site) as Part of the Countywide System Enhancements to the 800 MHz Radio Communication System Project (CP #3241)

Michael Postel, Police Communications Systems Director, Suffolk County Police Department, gave a presentation on the proposed project which involves the installation of radio communications equipment at the 1st Police Precinct in Babylon, St. Charles Hospital in Port Jefferson, and the GATR site in Montauk. This equipment installation will improve public safety radio communications in areas that currently have poor radio signals and will allow people located in these areas to communicate adequately with Suffolk County Police Headquarters.

Mr. Postel stated that at the 1st Police Precinct in Babylon the project will add a police antenna next to an identical existing antenna on the 1st Police Precinct Monopole. The additional needed equipment will be stored in the basement of the 1st Police Precinct building.

Mr. Postel noted that in Port Jefferson a police antenna will be installed on the St. Charles Hospital roof next to several existing roof antennas. The additional communications equipment will be installed within the hospital and will replace existing Police communications equipment.

Mr. Postel described that the proposed project at the GATR Site in Montauk. Mr. Postel noted that this project is an update to a 2007 CEQ reviewed emergency communications project which included the installation of 2 antenna poles but unlike the current plan also included the installation of equipment structures to house communication equipment. In addition, in 2007 the installation was planned to be done by a private cell carrier company and now the installation is planned to be done

by the County. Mr. Postel also specified that the two installed monopoles at the GATR site will replace two existing wood poles and said monopoles will be brown in color, not stripped or lit, and will not exceed the height of the existing wood poles at the GATR site.

Mr. Kaufman made a motion to recommend classification of the proposed project as an Unlisted Action with a Negative Declaration. The motion included the reasons in the SEQRA determination of non-significance for the 2007 GATR site project (Suffolk County Resolution No. 1334-2007). The motion also included that the installed monopoles at the GATR site will replace two of the existing wood poles on the GATR site and that said monopoles will be brown in color, not stripped or lit, and will not exceed the height of the existing wood poles at the GATR site. Mr. Gulbransen seconded the motion. Motion Carried.

Minutes:

Minutes for the February 19, 2014 CEQ meeting were reviewed and discussed. A motion was made by Ms. Spencer to approve the February 19, 2014 minutes. The motion was seconded by Mr. Bagg. Motion carried.

Public Portion:

There were no general public comments offered to the CEQ

Recommendations for LADS Report:

A. Recommendations for Legislative Resolutions Laid on the Table March 4, 2014

Mr. Corral noted that the staff's SEQRA recommendations are listed on the LADS report and in terms of the SEQRA recommendations there was nothing further to bring to the Council's attention.

Mr. Kaufman made a motion to accept staff recommendations as presented for the March 4, 2014 Legislative Resolutions. The motion was seconded by Mr. Gulbransen. Motion carried.

Other Business:

None

CAC Concerns:

Ms. Squires stated that she wanted to inform the Council regarding the importance of Carbon Monoxide (CO) monitors. Ms. Squires noted that she recently attended a Cleaner Greener LI meeting where Neil Lewis spoke about the importance of CO monitors. Ms. Squires shared with the Council some of the information she gained regarding CO monitors including the importance of using a digital monitor. Ms. Squires also noted that Town of Brookhaven is having a Public Hearing on 25th of March to consider new legislation introduced by Supervisor Ed Romaine to declare March “Carbon Monoxide Poisoning Awareness Month”. The Town Board of Huntington is considering resolutions on April 5th regarding legislation to require carbon monoxide monitors in commercial buildings.

Legislator Hahn noted that the Suffolk County Legislature just passed a resolution relating to equipping first responders, public health nurses, restaurant inspectors, and County employees that enter businesses and homes with portable CO detectors.

Historic Trust Docket:

Director’s Report:

Mr. Martin updated the Council on the following:

- Housing Program:
Mr. Martin stated that all available County housing units are currently occupied.
- Custodial Agreements:
Mr. Martin’s update noted that there has been no change since the February 19, 2014 meeting.
- Update on Suffolk County Environmental Center by Enrico Nardone, Executive Director of Seatuck Environmental Association
Mr. Nardone gave a history of the Scully Estate and provided information regarding Seatuck Environmental Association’s involvement with Suffolk County and the Scully Estate.

MEMORANDUM

TO: Council on Environmental Quality

FROM: Mark White, Chief of Division
Office of Chief of Support Services

DATE: March 10, 2014

SUBJECT: C.P.3241—Countywide System Enhancements to the 800MHz Radio Communications System

Per the 2014 Adopted Capital Budget, the Police Department is currently preparing the appropriating resolution for the above referenced project.

This project provides funds for the installation of equipment to improve public safety radio communications at several locations. The sites are Babylon (1st Pct. Monopole), Port Jefferson (roof of St. Charles) and Montauk (new site). The Montauk project was previously reviewed by CEQ and was determined to be an unlisted action, which will not have significant impacts on the environment by Suffolk County Resolution No. 1334-2007. The installation of nationally recognized P25 compliant equipment will enhance wireless communication in each of these areas. A P25 site is a miniature trunking system needed to fill in communication gaps in areas that have poor radio signals, and will help ensure quality communications. This equipment will allow users of these tower sites to communicate adequately with Suffolk Police Headquarters.

Please take the necessary action to supply the appropriate SEQRA clause to be included in the resolution.

If you have any questions, please contact Lt. Robert Scharf, Staff Services Bureau, at 852-6537 or Marianne Scheschowitz, Budget Analyst, at 852-6550.

Thank you,

/ms

Part 2 - RESPONSIBILITY OF LEAD AGENCY

Project Impacts and Their Magnitude

General Information (Read Carefully)

- In completing the form the reviewer should be guided by the question: Have my decisions and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. By identifying an impact in column 2 simply asks that it be looked at further.
- The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact rating.
- Each project, on each site, in each locality, will vary. Therefore, the examples have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- The number of examples per question does not indicate the importance of each question.

Instructions (Read carefully)

- a. Answer each of the 19 questions in PART 2. Answer **Yes** if there will be **any** impact.
- b. **Maybe** answers should be considered as **Yes** answers.
- c. If answering Yes to a question then check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If threshold impact equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- d. If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- e. If a potentially large impact or effect can be mitigated by a change in the project to a less than large magnitude, check the yes box in column 3. A No response indicates that such a reduction is not possible.

Determination of Significance

Portions of EAF completed for this project: ___ Part 1 ___ Part 2 ___ Part 3

Upon review of the information recorded on this EAF (Parts 1, 2 and 3) and considering both the magnitude and importance of each impact, it is reasonably determined that:

- A. The project will result in no major impacts and, therefore, is one which may not cause significant damage to the environment. **Prepare a negative declaration:** X
- B. **For unlisted actions only.** Although the project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in Part # have been included as part of the proposed project. **Prepare a CONDITIONAL negative declaration:**
- C. The project will result in one or more major adverse impacts that cannot be reduced and may cause significant damage to the environment. **Prepare a positive declaration , proceed with EIS:**

Part 3 - Responsibility of Lead Agency

Evaluation of the Importance of Impacts

Information

Part 3 is prepared if one or more impact or effect is considered to be potentially large.

The amount of writing necessary to answer Part 3 may be determined by answering the question: In **briefly** completing the instructions below, have I placed in this record sufficient information to indicate the reasonableness of my decisions?

Instructions

Complete the following for each impact or effect identified in Column 2 of Part 2:

1. Briefly describe the impact.
2. Describe (if applicable) how the impact might be mitigated or reduced to a less than large impact by project change.
3. Based on the information available, decide if it is reasonable to conclude that this impact is **important** to the municipality (city, town or village) in which the project is located.

To answer the question of importance, consider:

- The probability of the impact or effect occurring
- The duration of the impact or effect
- Its irreversibility, including permanently lost resources of value
- Whether the impact or effect can be controlled
- The regional consequence of the impact or effect
- Its potential divergence from local needs and goals
- Whether known objectives to the project apply to this impact or effect

Determination of Significance

An action is considered to be significant if:

One (or more) impact(s) is determined to **be** (both) **large** and its (their) consequence, based on the review above, is **important**.

Part 2 - RESPONSIBILITY OF LEAD AGENCY

Project Impacts and Their Magnitude

General Information (Read Carefully)

- In completing the form the reviewer should be guided by the question: Have my decisions and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. By identifying an impact in column 2 simply asks that it be looked at further.
- The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact rating.
- Each project, on each site, in each locality, will vary. Therefore, the examples have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- The number of examples per question does not indicate the importance of each question.

Instructions (Read carefully)

- a. Answer each of the 19 questions in PART 2. Answer **Yes** if there will be **any** impact.
- b. **Maybe** answers should be considered as **Yes** answers.
- c. If answering Yes to a question then check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If threshold impact equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- d. If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- e. If a potentially large impact or effect can be mitigated by a change in the project to a less than large magnitude, check the yes box in column 3. A No response indicates that such a reduction is not possible.

Upon review of the information recorded on this EAF (Parts 1, 2 and 3) and considering both the magnitude and importance of each impact, it is reasonably determined that:

- A. The project will result in no major impacts and, therefore, is one which may not cause significant damage to the environment. **Prepare a negative declaration:** X
- B. **For unlisted actions only.** Although the project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in Part # have been included as part of the proposed project. **Prepare a CONDITIONAL negative declaration:**
- C. The project will result in one or more major adverse impacts that cannot be reduced and may cause significant damage to the environment. **Prepare a positive declaration , proceed with EIS:**

Part 3 - Responsibility of Lead Agency

Evaluation of the Importance of Impacts

Information

Part 3 is prepared if one or more impact or effect is considered to be potentially large.

The amount of writing necessary to answer Part 3 may be determined by answering the question: In **briefly** completing the instructions below, have I placed in this record sufficient information to indicate the reasonableness of my decisions?

Instructions

Complete the following for each impact or effect identified in Column 2 of Part 2:

1. Briefly describe the impact.
2. Describe (if applicable) how the impact might be mitigated or reduced to a less than large impact by project change.
3. Based on the information available, decide if it is reasonable to conclude that this impact is **important** to the municipality (city, town or village) in which the project is located.

To answer the question of importance, consider:

- The probability of the impact or effect occurring
- The duration of the impact or effect
- Its irreversibility, including permanently lost resources of value
- Whether the impact or effect can be controlled
- The regional consequence of the impact or effect
- Its potential divergence from local needs and goals
- Whether known objectives to the project apply to this impact or effect

Determination of Significance

An action is considered to be significant if:

One (or more) impact(s) is determined to **be** (both) **large** and its (their) consequence, based on the review above, is **important**.

Part 2 - RESPONSIBILITY OF LEAD AGENCY

Project Impacts and Their Magnitude

General Information (Read Carefully)

- In completing the form the reviewer should be guided by the question: Have my decisions and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. By identifying an impact in column 2 simply asks that it be looked at further.
- The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact rating.
- Each project, on each site, in each locality, will vary. Therefore, the examples have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- The number of examples per question does not indicate the importance of each question.

Instructions (Read carefully)

- a. Answer each of the 19 questions in PART 2. Answer **Yes** if there will be **any** impact.
- b. **Maybe** answers should be considered as **Yes** answers.
- c. If answering Yes to a question then check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If threshold impact equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- d. If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- e. If a potentially large impact or effect can be mitigated by a change in the project to a less than large magnitude, check the yes box in column 3. A No response indicates that such a reduction is not possible.

Evaluation of the Importance of Impacts

Information

Part 3 is prepared if one or more impact or effect is considered to be potentially large.

The amount of writing necessary to answer Part 3 may be determined by answering the question: In **briefly** completing the instructions below, have I placed in this record sufficient information to indicate the reasonableness of my decisions?

Instructions

Complete the following for each impact or effect identified in Column 2 of Part 2:

1. Briefly describe the impact.
2. Describe (if applicable) how the impact might be mitigated or reduced to a less than large impact by project change.
3. Based on the information available, decide if it is reasonable to conclude that this impact is **important** to the municipality (city, town or village) in which the project is located.

To answer the question of importance, consider:

- The probability of the impact or effect occurring
- The duration of the impact or effect
- Its irreversibility, including permanently lost resources of value
- Whether the impact or effect can be controlled
- The regional consequence of the impact or effect
- Its potential divergence from local needs and goals
- Whether known objectives to the project apply to this impact or effect

Determination of Significance

An action is considered to be significant if:

One (or more) impact(s) is determined to **be** (both) **large** and its (their) consequence, based on the review above, is **important**.

HAMPTON**

WHEREAS, the Suffolk County Council on Environmental Quality (CEQ) has reviewed a project designated as the "Proposed Emergency Communications Facility at the GATR Facility, T. Roosevelt Co. Park, Town of East Hampton", pursuant to Section 6 of Local Law No. 22-1985 which project involves the construction of two wireless communications antenna poles and associated equipment structures at the Roosevelt County Park GATR site to transmit 911 and emergency service calls; and

WHEREAS, an Environmental Assessment Form (EAF) was prepared and submitted to the CEQ Office by the Suffolk County Department of Parks and subsequently sent out to all concerned parties; and

WHEREAS, at its November 21, 2007 meeting, the CEQ reviewed the EAF and information submitted by the Suffolk County Department of Parks; and

WHEREAS, the CEQ recommended that the above activity be considered an unlisted action, pursuant to the provisions of Title 6 NYCRR, Part 617 and Chapter 279 of the Suffolk County Code; and

WHEREAS, the CEQ has advised the County Legislature and the County Executive by memo dated November 26, 2007 of said recommendations; and

WHEREAS, Section 279-5(H) of the SUFFOLK COUNTY CODE requires the Presiding Officer to introduce legislation for an appropriate SEQRA determination; and

WHEREAS, the Suffolk County Legislature has reviewed the EAF and the CEQ recommendations; now, therefore be it

1st RESOLVED, that this Legislature hereby determines that the Proposed Emergency Communications Facility at the GATR Facility, T. Roosevelt Co. Park, Town of East Hampton constitutes an unlisted action, pursuant to the provisions of Title 6 NYCRR, Part 617 and Chapter 279 of the Suffolk County Code, which project will not have significant adverse impacts on the environment for the following reasons:

- 1.) The proposed action will not exceed any of the criteria in Section 617.7 of Title 6 NYCRR, which sets forth thresholds for determining significant effect on the environment; and
- 2.) The proposal does not appear to significantly threaten any unique or highly valuable environmental or cultural resources as identified in or regulated by the Environmental Conservation Law of the State of New York or the Suffolk County Charter and the Suffolk County Code; and

- 3.) The parcel does not appear to suffer from any severe environmental development constraints (limiting soil properties; no high groundwater and no unmanageable slopes); and
- 4.) The project is compatible with the historic use of the site which served as a cross Atlantic telecommunication facility during World War II and after; and
- 5.) The two (2) antenna poles will replace existing poles on the site; and
- 6.) A Stage 1A and Stage 1B Archaeological Survey of the GATR facility has concluded that no significant archaeological resources exist at this site; and
- 7.) The former antenna poles at the GATR site serve as a navigation reference point for small offshore boats; and be it further

2nd **RESOLVED**, that a copy of this Resolution shall be filed with the Suffolk County Clerk, the initiating unit of said project, and with the CEQ; and be it further

3rd **RESOLVED**, that in accordance with Section C1-4(1)(d) of the SUFFOLK COUNTY CHARTER and Section 279-5(C)(4) of the SUFFOLK COUNTY CODE, the CEQ is hereby directed to prepare and circulate a SEQRA notice of determination of non-significance in accordance with this Resolution.

DATE: March 20, 2014

RE: CEQ Review of the Proposed Installation of Public Safety Radio Communication Equipment at Babylon (1st Precinct Monopole), Port Jefferson (Roof of St. Charles Hospital), and Montauk County Park (GATR Site) as Part of the Countywide System Enhancements to the 800 MHz Radio Communication System Project (CP #3241)

At its March 19, 2014 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, as well as that given in a presentation by Michael Postel, Police Communications Systems Director, Suffolk County Police Department, the Council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 15-2014, a copy of which is attached, that the proposed project be considered an Unlisted Action under SEQRA that will not have significant adverse impacts on the environment.

If the Legislature concurs with the Council on Environmental Quality's recommendation that the project will not have a significant adverse impact on the environment, the Presiding Officer should cause to be brought before the Legislature for a vote, a resolution determining that the proposed action is an Unlisted Action pursuant to SEQRA that will not have significant adverse impacts on the environment (negative declaration). However, if the Legislature has further environmental concerns regarding this project and needs additional information, the Presiding Officer should remand the case back to the initiating unit for the necessary changes to the project and EAF or submit a resolution authorizing the initiating unit to prepare a draft environmental impact statement (positive declaration).

Enclosed for your information is a copy of CEQ Resolution No. 15-2014 which sets forth the Council's recommendations. The project EAF and supporting documentation can be viewed online at <http://www.suffolkcountyny.gov/Departments/Planning/Boards/CouncilonEnvironmentalQuality>.

CEQ RESOLUTION NO. 16-2014, RECOMMENDATION CONCERNING A SEQRA CLASSIFICATION AND DETERMINATION FOR THE PURPOSES OF CHAPTER 450 OF THE SUFFOLK COUNTY CODE FOR THE PROPOSED INSTALLATION OF PUBLIC SAFETY RADIO COMMUNICATION EQUIPMENT AT BABYLON (1ST PRECINCT MONOPOLE), PORT JEFFERSON (ROOF OF ST. CHARLES HOSPITAL), AND MONTAUK COUNTY PARK (GATR SITE) AS PART OF THE COUNTYWIDE SYSTEM ENHANCMENTS TO THE 800 MHz RADIO COMMUNICATION SYSTEM PROJECT (CP#3241)

WHEREAS, at its March 19, 2014 meeting, the Suffolk County Council on Environmental Quality (CEQ) reviewed the EAF and associated information submitted by the Suffolk County Police Department; and

WHEREAS, a presentation regarding the project was given at the meeting by Michael Postel, Police Communications Systems Director, Suffolk County Police Department; and

WHEREAS, the project involves the installation of radio communications equipment at the 1st Police Precinct in Babylon, St. Charles Hospital in Port Jefferson, and the GATR site in Montauk; and

WHEREAS, this equipment installation will improve public safety radio communications in areas that currently have poor radio signals and allow people located in these areas to communicate adequately with Suffolk County Police Headquarters; and

WHEREAS, the equipment installed at the 1st Police Precinct in Babylon includes an approximately 8 foot long antennae which will be located next to an identical existing antenna on the 1st Police Precinct Monopole as well as additional communication equipment to be stored in the basement of the 1st Police Precinct Building; and

WHEREAS, the equipment installed on the St. Charles Hospital roof includes an approximately 8 foot long antennae which will be located next to exiting roof antennas as well as additional communications equipment installed within the hospital which will replace existing Police communications equipment; and

WHEREAS, the equipment installed at the GATR site in Montauk includes antennas attached to the top of two monopoles and additional communications equipment installed inside an existing concrete storage building; and

WHEREAS, the two installed monopoles at the GATR site will replace two of the existing wood poles on the GATR site and said monopoles will be brown in color, not stripped or lit, and will not exceed the height of the existing wood poles at the GATR site; and

WHEREAS, the proposed project at the GATR site is an update to a 2007 reviewed emergency communications project which included the installation of 2 antenna poles but unlike the current plan also included the installation of equipment structures to house communication equipment; and

WHEREAS, the 2007 proposed communication project at the GATR site was reviewed by the CEQ and the Suffolk County Legislature and received a SEQRA determination of non-significance as indicated in Suffolk County Resolution No. 1334-2007; now, therefore, be it

1st RESOLVED, that based on the information received and presented, a quorum of the CEQ hereby recommends to the Suffolk County Legislature and the County Executive that the proposed project be classified as an Unlisted Action under the provisions of Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code; and, be it further

2nd RESOLVED, that based on the information received, a quorum of the CEQ recommends to the Suffolk County Legislature and County Executive, pursuant to Title 6 NYCRR Part 617 and Chapter 450 of the Suffolk County Code, that the proposed project will not have significant adverse impacts on the environment for the following reasons:

1. the proposed action will not exceed any of the criteria in Section 617.7 of Title 6 NYCRR which sets forth thresholds for determining significant effect on the environment, as demonstrated in the Environmental Assessment Form;
2. the proposal does not appear to significantly threaten any unique or highly valuable environmental or cultural resources as identified in or regulated by the Environmental Conservation Law of the State of New York or the Suffolk County Charter and Code;
3. the parcels do not appear to suffer from any severe Environmental development constraints (limiting soil properties; no high groundwater and no unmanageable slopes);
4. the antennas installed on the 1st Police Precinct Monopole and the St. Charles Hospital roof will be located next to existing antennas;
5. the proposed action at the GATR site in Montauk is compatible with the historic use of the site which served as a cross Atlantic telecommunication facility during World War II and after;
6. a Stage 1A and Stage 1B Archaeological Survey of the GATR facility has concluded that no significant archaeological resources exist at this site;
7. the former antenna poles at the GATR site serve as a navigation reference point for small offshore boats;
8. the two (2) monopoles installed at the GATR site will replace existing poles on the site;
9. the two (2) monopoles installed at the GATR site will be brown in color, will be unstripped and unlit, will have interior wiring, and will not exceed the 88 foot height of the existing poles on the site;

and, be it further

3rd RESOLVED, that it is the recommendation of the Council that the Legislature and County Executive adopt a SEQRA determination of non-significance (negative declaration).

At its March 19, 2014 meeting, the CEQ reviewed the above referenced matter. Pursuant to Chapter 450 of the Suffolk County Code, and based on the information received, the Council recommends to the Suffolk County Legislature and County Executive in CEQ Resolution No. 17-2014, a copy of which is attached, that the enclosed list of legislative resolutions laid on the table March 4, 2014, be classified pursuant to SEQRA as so indicated in the left hand margin.
